The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-5,9 and 10 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Hu, of record.

The previous rejection still applies. The limitation "about 100 microns" does not structurally distinguish over Hu because about is broad and there is no clear direction in the specification that a length of 115 microns is not about 100 microns. Secondly, there is some argument from the specification that up to 200 microns is about right. See paragraph 0013. Third, since taller and higher aspect indium bumps are preferable and desired, a bump of smaller size than 115 microns, say 100 microns, is obvious if not anticipated by Hu. Likewise, claim 10 reciting a width of 50-55 microns is obvious as higher aspect ratio bumps are preferable. Bumps of greater thickness than the nominally disclosed thickness of Hu, say 13-14 microns (col.6 lines 33-53), are obvious as smaller width and higher aspect ratio bumps are preferable. Bumps 50-55 microns in thickness are obvious. In regard to claim 9 see the recited product by process caselaw. The final structure of claim 9 is anticipated or obvious over Hu.

Applicant's arguments filed 2/4/5 have been fully considered but they are not persuasive. As stated above, arguments regarding the height of Hu's bumps are unconvincing of patentability as "about 100 microns" neither distinguishes over 75 microns nor 115 microns. Regarding claims 4 and 5, again, "about" is broad and does not structurally distinguish over Hu. There is no clear indication in the claims what defines "about", and furthermore, the separation distance in Hu is of similar magnitude

as the height of two bumps in contact and compression is "about" 100 microns. Smaller separation distances than the tallest height is also obvious as taller height is preferable.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
